## ZOMO FLIGHTCASE P-OPUS-QUAD

The Zomo Flightcase P-Opus-Quad NSE Flight Case was produced suitable for the **Pioneer DJ Opus Quad** DJ controller DJ controller. The Flightcase P-Opus-Quad NSE in the noble NSE (= Night Style Edition) inspires thanks to its deep black look. This modern equipment case is **extremely robust** to survive the strenuous tour everyday life without any problems.

To prevent the controller from shaking, the Opus Quad Flightcase is equipped with an excellent **inner padding**, which protects the device from defects, scratches or external damage. To keep your valuable DJ equipment safe from the challenging DJ daily routine, the Zomo DJ Cases are of course road and flight ready. For easy transport the Zomo Flightcase is **equipped with wheels**.

Thanks to the high-quality processed, **laminated 9mm plywood**, the Flightcase P-Opus-Quad NSE Equipment Case is strongly shock and scratch resistant and therefore armed against abrasion or cigarette burns. The extra wide and black painted **aluminum profiles** and extra stable **ball corners** provide for noble and appealing optical details, which give the flight case a high durability.

Even if your equipment is still in the flightcase, the **front cover** can be easily and quickly **removed** before the performance. We recommend the optional ZOMO EA-1 ANGLE ADAPTER to plug in the headphones even easier to the DJ mixer.

Also in terms of design, the Pioneer DJ Equipment Flightcase can fully inspire. The noble design in the midnight black NSE edition is absolutely stylish and without question an eye-catcher. For an exceptionally tight fit of the lid and easy unlocking and locking provide the practical butterfly snap locks. Also all NSE Equipment Cases are lockable with an optional padlock for higher protection against theft.
