CUSTOM ML CUNIFE® WIDE-RANGE HUMBUCKER PRE-WIRED STRATOCASTER® PICKGUARD

Designed specifically to fit the Michael Landau Coma Stratocaster, this pre-wired pickguard features the Custom ML CuNiFe® Wide-Range Humbuckers. The custom-voiced Wide-Range CuNiFe humbucker bridge and neck pickups have a slightly hotter output while still retaining the “hi-fi” clarity that Wide Range humbuckers are known for. Both pickups are custom wound to the artists exacting specifications and are mounted in a brown shell pickguard that is slightly larger than standard and designed to fit perfectly on the signature Coma Stratocaster.
