COBALT CHROME JAZZ BASS® PICKUP SET

Voiced by tone guru, Tim Shaw, Cobalt Chrome utilizes the perfect magnetic combination to unlock the full tonal potential of your Precision Bass. The Cobalt Chrome Precision Bass pickups use our own proprietary blend of a FeCrCo magnet that bring a new voice and attitude to your instrument.

Cobalt Chrome magnets bring added punch, hi-fi clarity and dynamic range that players will be inspired by while still offering the sweet low end and thump produced by the original electric bass. The distinctive-looking chrome-ringed cover acts as a shield to help eliminate 60-cycle hum, making these pickups a remarkably true and quiet split-coil option.
