

AU-PM422

MONITORABLE USB CONDENSER MICROPHONE SET

AU-PM422

Maono AU-PM422 microphone has a built-in audio processor with a high sample rate.

The USB output allows it to be easily connected to a computer.

You can use any of your favorite software to record music or other sound sources digitally.

The cardioid polar pattern records clear audio directly in front of the microphone while rejecting noises coming from other directions.

It has studio-quality audio and is great for singing, podcasting, dubbing, and home studio recording.
