

AP33 35W AMPLIFIER/MONITOR FOR ELECTRONIC DRUM

AP33 is an electronic drum amplifier / monitor with 35W output power.

The frequency response is optimized in order to improve the characteristics of the drum pads so as to offer excellent sound with powerful bass.

The AUX input allows the reproduction of audio signals coming from external devices and therefore it is possible to play the drums at the same time.

Two convenient knobs (BASS and TREBLE) allow you to adjust the low and high frequencies of the drum sounds.

AP33

35W AMPLIFIER/MONITOR FOR ELECTRONIC DRUM
