HARMONICA CX-12 TUNING C

Wow!! That's quite a harmonica. The sleek lines of the racy looking 'Jazz', constructed on the basis of the tried and tested CX12, make it a real attentiongrabber. In response to requests from a number of CX12 fans, Hohner made the new mouth-piece design narrower, which some players find suits their embouchure better. The new housing is fully compatible with all other CX12 models and is coated using an Ultraglide multilayer treatment.

PRODUCT DETAILS

KEY FEATURES

Jazz Chromatic Harmonica

Tuning: C

Holes: 12

48 reeds

Brass plate

Reed Plate thickness: 1,05 mm

Length: cm 16.8

Mouthpiece surface: ABS lacquered
