## DJM-450-K
2 CHANNEL MIXER

A new two-channel mixer is joining our range: the DJM-450. Inheriting features and design elements from the flagship DJM-900NXS2, the DJM-450 is the ideal mixer to partner with XDJ-700 multiplayers or PLX-1000 turntables to create a professional-style set-up. It comes bundled with licence keys for rekordbox dj and rekordbox dvs (worth a combined €248) so you can DJ with tracks stored on your PC/Mac when using turntables and our control vinyl (available separately).Mixing on the DJM-450 is seamless thanks to the smooth curves on the EQs and channel faders. The Magvel crossfader, inherited from the DJM-900NXS2, gives an accurate response and assured feel during complicated scratch techniques. Sound Colour FX and Beat FX with parameter control also come from our flagship mixer, so you can add professional creative flair to your mixes. Warm, high-quality audio from both analogue and digital sound sources comes thanks to the 64-bit digital signal processor which uses dithering technology, and the built-in sound card means you can connect the DJM-450 to your PC/Mac with a single USB cable and use the bundled rekordbox dvs application to control your digital tracks with turntables and the dedicated control vinyl.
