

AC-60

# ACOUSTIC GUITAR AMPLIFIER W/ DRUM&LOOP (60W RMS)

---

The Stageman II AC-60 has 2 channels and both are optimized for acoustic guitar and microphone inputs respectively. The dual-input channels, on the NUX Stageman II AC-60 acoustic guitar amplifier, provide you with even more options for gigs or studio recording.

Equipped with NUX's latest DSP technology, the Stageman II AC-60 delivers pure, rich acoustic sound with projection far beyond its size. The Stageman II AC-60 has flexible outputs for both stage and recording applications, and is designed for your interface needs.

Equipped with this creative 2-way high-sensitivity speaker system, the Stageman II delivers incredible sound dynamics. To top it off, our cabinet design features a beveled-angle carefully calculated to provide optimal live sound monitoring.

The Stageman II is loaded with 8 impulse response files: each impulse response file is optimized for the guitar type and the pickup type. The IR file names are included in the guitar profile, optimized guitar type, and the pickup type. Connect the Stageman II with your mobile phone (app) to activate/deactivate the IR function.

The stageman II, comes stock with a dual-footswitch in the package, so you can easily control the built-in Looper and Drum. You can play solo just like with a band!

NUX also developed a mobile App for you to control the Stageman II amplifier with your smart phone: you can manage 12 Fxs, 8 IRs, switch amps channels and change signal routing. And you can connect your mobile phone with Stageman II via the Bluetooth, and play along with your favorite music.

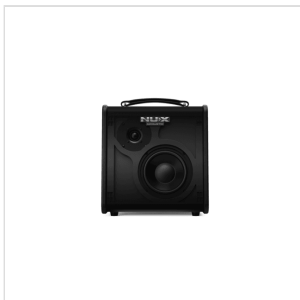

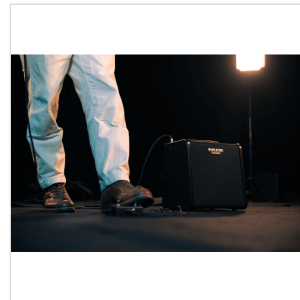

XLR DI output and Line output jack can be used as an analog audio-out for recording or sending to a monitor.

To accentuate your customized sound, Send/Return FX Loop inputs interface with any of your essential effects gear.
